# Week 6 Tasks

## Week 6: Final Project and Presentation

- Project Planning: Define and plan a comprehensive deep learning project, incorporating elements from previous weeks.
- Data Preparation: Collect, preprocess, and analyze the dataset to be used in the final project.
- Model Development: Develop and train a deep learning model tailored to the project requirements.
- Evaluation and Refinement: Evaluate the model's performance, refine it based on feedback, and document the findings.
- Presentation: Prepare and present the project to peers or mentors, demonstrating proficiency and discussing project insights.
